Something I missed in the preview. My guess is that the author built the game using the Zuffa Engine. All of the functionality appears in the menu system and the interface. Superman2 01-29-2005, 07:13 AM This looks like the Darksouls ripoff that Sega was working on but pulled because the graphics were looking too much like that game. Raohf 01-29-2005, 07:15 AM I like how the Zuffa game engine supports that too, in an easy to use, easy to learn engine. Raohf 01-29-2005, 07:31 AM I like the online interaction, well done and more importantly it seems real. Did it take many years to make the game or just a few months? Superman2 01-29-2005, 08:06 AM The game looked exactly like Darksouls because Sega had lots of trouble making the Darksouls 3D engine play well on most PCs, so I'm very glad they switched engines. For some reason I like games that have a fighting style. If it ever gets really awesome at it, I'll buy it. So far, it looks cool. Superman2 01-29-2005, 08:28 AM
