What's new:

Emerge: Cities of the Apocalypse is a 2015 dystopian role-playing video game developed and published by Arc System Works featuring a team of four survivors who find themselves on a supposedly deserted island as the world around them begins to fall apart. The mobile game features open world elements and requires the player to engage in combat. Gameplay Emerge: Cities of the Apocalypse is a four player cooperative, free to play, action role-playing game for iOS and Android devices. There are no traditional hand-holding tutorials, instead, the game's dialogue is represented via elements such as collectible booklets to give in-character and out of character moments to the player's team as they progress through the game. Instead of the more typical method of players completing quests while playing a game, much of the plot-based gameplay is governed by the player encountering different situations that are resolved by the player's characters. The game's turns are often asynchronous, meaning that the players have more free time within their lives to concentrate on their characters' progression by performing day-to-day activities. The game requires players to complete a minimum of three main character assassination targets, before unlocking the third and final playable character. Players can choose from four playable characters: Dejoj, an ex-general-type member of the United Federation's space fleet; Hypnos, an ex-Thargoid ship captain of Sector Epsilon 19; Drif, a genetic engineer of Bogen's Rebellion; and Irene, an ex-lover and present-day leader of the Shrike's Bane space fleet and the first playable character. When exploring the different regions of its open world setting of Amada, players are expected to complete assigned objectives, as well as complete over 40 optional missions presented by random encounters. All four characters gain experience based on the gameplay activities players carry out during the gameplay life of each character, which results in their characters gaining experience and becoming more powerful. The gameplay features several different play methods for the game's four-player cooperative gameplay. In between all of the gameplay elements, Emerge: Cities of the Apocalypse features a voice-acted and animated story campaign in which the characters make their way through a sci-fi world where civilization has been left decimated by a series of mysterious global events colloquially referred to as a caldera event, that seems to be caused by an unknown and insatiable alien presence, known as tyrants. Players can choose from over 40 missions to play during an
