Viper With Registration Code

Viper is a professional desktop antivirus that is guaranteed to protect your computer from harmful malware. It comes with a great reputation for supporting the latest and most important security technologies and updates. It has the ability to automatically update itself on all the platforms you use, so you can be sure that all the threats will be eliminated on a timely basis. You will enjoy simple tasks and a reliable tool that features an intelligent scanning engine that takes constant care of your computer without affecting its performance. Other interesting options include the ability to block toolbars and browser extensions, eliminate the most common browser tracks, track the history of a page or stop Internet advertisers from collecting user data. Being an award-winning anti-malware solution, Viper comes packed with some useful advanced options that allow you to connect to your desktop's firewall, more importantly stop it from blocking connection attempts. For users who want to quickly and easily delete all the traces of the program on the computer, Viper comes with a dedicated eraser software that can securely wipe the memory on your PC. The utility is capable of erasing logs, files, malicious browser histories, cache, cookies and password database. The installation process is fairly simple and it does not require any additional downloads or third-party tools. Verdict There is a definite lack of learning curve with Viper and it is easy to figure out all the functionalities. Thanks to the fact that it comes with a well-organized interface, you will be able to access the features with just a few clicks or keystrokes. You will also appreciate the versatility of Viper, as the variety of tools provided by the utility is second to none, with a couple of useful advanced options not even found in other antivirus scanners. Viper Description: Viper is a professional desktop antivirus that is guaranteed to protect your computer from harmful malware. It comes with a great reputation for supporting the latest and most important security technologies and updates. What's New In Viper?

Viper Email Collector is a spyware designed specifically for users who need to gain a deeper insight into the browsing habits of the users with email addresses belonging to their circle of relatives and friends. It helps you to discover the personal information that usually goes unseen. You can set the display list name, remove unwanted entries from the contact list, reject unwanted messages, and save your precious time. With Viper Email Collector, you can: View your entire email address book Viper Email Collector offers a safe way to view your entire email address book. Just place your email address books onto the program's toolbars, and then click on the 'Analyze now' button to begin the email collection process. You can always adjust the display list name, remove unwanted entries from the contact list, reject unwanted messages and even save your precious time by displaying only the emails sent from or received to your targeted contacts. Identify Existing Email Address Book Records Viper Email Collector will allow you to identify existing records and hidden email addresses in your address book. You can then delete unwanted records, blocking the people behind the same email addresses. In addition, if you want, you can view the entire list of hidden email addresses and instantly remove them by selecting the relevant rows on the list. Remove Unwanted Email Messages Viper Email Collector will allow you to view and export your entire email address book as well as to directly search for and remove any email messages you don't want to receive, such as an invoice, payment confirmation, promotional offers, etc. Export Email Address Book Viper Email Collector allows you to export your address book in two different formats. You can either export to a text file or to a CSV file. You can also export the contacts in an email format, to Outlook, Thunderbird, Google Contacts and Outlook. Identify Email Addresses Viper Email Collector has the ability to identify email addresses, which allows you to edit email addresses that are similar or similar to each other. Viper Email Collector will also allow you to automatically search for address variations, the number of times a contact appears in your address book and the length of the email. Prevent Spam by Blocking Email Addresses Viper Email Collector will allow you to prevent spam by blocking contact email addresses found within the list. You can also discard the email addresses of the mail that you don't want by deactivating the link within the email. For this, you have to add the corresponding email address list
