1. Description VR Puzzle Box is a game that you can play by the motion of hand. We consider that VR Puzzle Box has advantages and disadvantages compared with the existing games. 1. Advantages -A game can be played by the simple movement of hand -A game can be played for free -There is no such illness as fatigue after playing a game for long hours 2. Disadvantages -The game is more challenging than the other games -The game is difficult to play when playing in comparison to the existing games -It is more difficult to play for the people who have a headache or exhaustion -The game is not easy to play for children and the elderly 3. Game Structure VR Puzzle Box is a game that you can play by the motion of hand. But we consider that it is not easy to play the game depending on your situation and there is a difficulty to play for you, even by your decision. VR Puzzle Box has four story chapters that you can play. The game is different each chapter. If you play the game for one chapter, you can play the following chapter by you answer. Therefore you don't need to play each chapter's chapter, it is possible to know how to the game by the time you play this game once. The new story for the story chapter starts when you complete the chapter. Therefore you will not experience a "time lag". Each chapter is set to begin at 3 pm everyday. This is the evening time on each day. You can play the game before 3 pm or after 3 pm everyday. Also, there is an option to play an alternative story instead of the chapter story that you do not want to play. So, you can experience various stories by playing the game. The alternative story for the chapter story is set in the following dates and times. The set day/time for the alternative story 16/10/2020 8/00 – 8/00 15/11/2020 8/00 – 8/00 (Note: The set day/time for the chapter story and alternative story are the same. Just change the two date/time words.) The alternative story will start 30 minutes after you complete the chapter story, so you can start playing the game earlier than 3 pm everyday. 1. Best time for you to play. If you already make the decision that you want to play VR Puzzle Box, it is better to play it on the day time than midnight or the evening

What's new:

Has anybody out there checked out Lock 'n Load Tactical Digital? I know the guys at Foundry are pretty positive about LnL and I've heard lots of good things about the Lightning online demo that came out recently. I, on the other hand, just don't do digital. It seems like there is a sensible argument for either, but digital it isn't for me. I have played at least ten hours of Ripcord Combat pack against the Ripcord digital simulator on my iPad. I don't own any Ravi games and (aside from the Reverb) I play board games and RPGs on a wide variety of things. I'm pretty sure that, say, some of the better iPad RPGs are not being commercially released because there isn't that much of a market for them on the iPad or Android. Clearly the market isn't large enough to sustain a large development team. Some of the more popular Ravi games (but certainly not all) are less oriented toward the actual game mechanics and more toward the franchise aspect. I recall (I think) that the Reverb store only carries a handful of franchises. I can't readily identify the Star Wars: Armada that I played last night versus several LnL Battleships and a couple of the LnL Battlepacks. I realized that I am, to a great degree, in the position that I read more critiques from the boardgaming type than I do reviews of the boardgames. In fact, since the 'verse is a captive audience, I don't even know if there is a mass market for the Ravi game that I really do like. It is just not something I like doing, so I haven't bothered with it. I like and support the guys at Foundry because they are great table tops and I can potentially play more games at my house with the deck of play, but there is nothing exotic about their games and I like that about them. I know that I have a "problem" that can't be helped unless I grow up. That doesn't seem to be an option for me as long as I continue to be who I am. For me, if there was a Ravi game that was as rich in game mechanics as, say, Alpha Protocol, or as competitive as, say, Core Worlds: Universal, I would be motivated

"Reanimation Scheme" features an interactive romance with easy-to-use dialogue menus, and various branching story paths that lead to different outcomes. The key feature of "Reanimation Scheme" is its ability to easily utilize multiple options and choices for its main heroine to experience a romantic narrative that can be customized towards every preference. With the three choices that you make throughout the story, you can experience a multitude of different endings. Reanimation Scheme is a manga-style story where the main heroine Raenelle, the only female necromancer in the kingdom, finds herself not only imprisoned and under investigation for murder and complicity in necromantic activities, but also for a seemingly accidental death of a high-ranking political figure. With a wealth of evidence and corrupted blood samples on her hands, she is being framed for the murder of the Empress. Reanimation Scheme was created by Kibe and was released on Android and PC on 19 July 2018. Characters Raenelle Talisko: The necromancer of a small village of Arnos in the kingdom of Lysaris. Enlisted as a new Death Mage at the Necromancy Headquarters, she is being investigated by the authorities for her alleged participation in the recent disappearance of countless spirits that were reanimated. Raenelle is the only female necromancer and is charged with the sole task of finding out the reason for this sudden disappearance. Raenelle is trying hard to prove her innocence and is also desperately trying to prove herself to be able to one day serve in the position of Head Necromancer. With a calm and collected attitude, she is gradually uncovering her own family history, her background and why she was assigned to assist the Head Necromancer despite being the only woman who has ever sought employment at the HQ. A skilled artist in magic, Raenelle is also a capable researcher and always ready to listen to reason. Serhann: The Elder of the village of Arnos, Serhann is in charge of taking care of the residents and reanimated spirits of the village, most of which are ghosts that were exorcized from the village long ago. Contrary to his young appearance, he is the acting head of the police force, and he sees a conspiracy in the disappearance of the spirits. With a firm stance against any necromancy, he had to endure many death threats from people that saw him as the villain behind the demonization of the souls of the deceased in
