## **Official Gapps For Android 4.2.2 Jellybean Flashable.zip PORTABLE**

Yes, here's how you get all libraries for app for such installers When you install apk in OS it extracts it but in recovery mode it doesn't... I don't know if it will be a problem or not  
But if you want to use this method you can use the apk-build-system library to find out if how to do it. Link <https://github.com/KeithWald/apk-build-system> to use. Either way,  
here's how you package your application. It will be a bit more complicated than just installing the apk or packaging the apk. In any case, you have to be careful not to write the  
libgmp files to the /sdcard/app folder as I did above.
