Choose a file.The present invention relates to a multi-station telephone station set, more particularly to a multiple line interface circuit for use with the multiple line station set. In a multiple line station set having a plurality of line circuits, it has been often required to provide a means for selectively connecting one of the line circuits to a pair of subscriber station lines for providing a call. This function is generally known as auto-dial. The dual line detection circuit used as the auto-dial function in the single line telephone system includes two flip-flop circuits, each of which receives the common line signal from the subscriber line. The first flip-flop circuit functions as a line detection circuit and outputs a high logic level signal to the second flip-flop circuit as soon as it detects the common line signal. This function to the output of the first flip-flop circuit is referred to as "line on" detection. The second flip-flop circuit functions to transmit the line on signal to the line circuit thereby enabling the call. However, a prior art auto-dial circuit using the flip-flop circuit as the line detection circuit is defective in that the flip-flop circuit uses a silicon controlled "jitter", so that the flip-flop circuit becomes unreliable under a hot environment of high temperature.Cougar Coloring Page Cougar Coloring Page - Coloring pages are fantastic for kids of all ages, but they are particularly effective as an educational tool for kids that struggle with the concept of time and organization. These coloring pages can be used to help with specific time concepts (like time to school, time to eat, time to sleep) or just to help kids be more aware of their behavior patterns. Some students will be less inclined to color in something that resembles their own handwriting and will prefer using one of these cute fun bears. Coloring pages are fantastic for kids of all ages, but they are particularly effective as an educational tool for kids that struggle with the concept of time and organization. These coloring pages can be used to help with specific time concepts (like time to school, time to eat, time to sleep) or just to help kids be more aware of their behavior patterns. Some students will be less inclined to color in something that resembles their own handwriting and will prefer using one of these cute fun bears.The Brake is a company that is constantly trying to improve upon its products, its products sometimes go from good to great. But once in a while, a product comes along that is an absolute monumental leap in terms of innovation. The Brake Bayonet Lock is exactly that type of product. It's an absolute masterpiece when it comes to its design, its approach to security and this guys knows how to complement a fine timepiece with a high-end design. I will admit, I'm a bit biased when it comes to the "gearheads" in this community, and Brake Bayonet is definitely one of the best, if not the best. But maybe it's time to give it a second look.
