Lightroom 5 makes the cross-platform use of a computer as a photography studio even easier. The ability to sync two computers using a Wi-Fi connection makes your catalog the same across both platforms, and you can set it up to sync the catalog, previews, and your online gallery all at once. It's a convenient way to make sure your images are always up to date, and to allow your computer to be your connection to the wide world of on-line galleries. Creative Suite 5.0 includes powerful premium tools for advanced, digital photographers, Web designers, animators, video professionals, and anyone who wants to quickly produce the highest-quality results with their digital images, photography and illustrations. Superior photo management, HTML/web design, 3D modeling, and video editing tools help you create powerful presentations, slideshows, interactive slideshows, and video projects for you and your clients. The most recent version of Adobe Photoshop doesn't seem to work on the iPad Pro, so I only had the older 2017 version to review. It provides a lot of the same features, so don't worry – this review isn't going to be too foreign to you. **ABOVE:** Colour gradient highlights of the same image in Photoshop Elements. **BELOW:** Adding a fireworks rocket to the Photoshop Elements canvas. Photoshop Elements 5 on the iPad Pro offers a bunch of useful painting tools, including a gradient tool. I love the iPad Pro for Final Cut Pro, but it's a bit limited. The included version of Final Cut Pro has a limit of 16 or 32GB of onboard storage. Not only is that a thing of the past (32GB is actually more than enough!) but also Apple has gone on to reduce the overall storage limits of Final Cut Pro. With the new macOS Catalina operating system, the limit is now 128GB in regular and 256GB in Pro editions. Additionally, the size of a Final Cut Pro project for iOS is now only 5GB. I don't really like the downgrading of Final Cut Pro, but it's actually better for the iPad Pro. **ABOVE:** Final Cut Pro can now exceed the 128GB storage limit. **BELOW:** Adding a new taxonomy term to the Final Cut Pro audio mix with Colour Lane. Final Cut Pro X on an iPad Pro is an interesting experience but I don't think it will take off, as quite a bit of what makes Final Cut Pro great is being lost in the transition.

With Share for Review, you can share Photoshop documents and work in Photoshop while you are online on Mac, Windows and mobile. Photoshop on the web, Adobe XD on the web, and Photoshop for iOS are also available in the Share for Review beta. Edit in Photoshop Elements 2019 (beta) – As of today, Adobe Photoshop Elements 2019 is also advancing the category of content-aware technologies in the editable image category. This new version of the program introduces the Content-Aware Move tool, which simplifies content-aware editing by providing a variety of specialized options, including one-click support for replace and remove. The Content-Aware Move tool is the first reproducible edit in the editable image category, because it allows you to repeat the same workflow as long as you have the same image on both sides of your image. Elements 12 brings a host of improvements, including improved performance, a new interface, support for 3D Touch and refined image quality. Most notably, Elements 12 now comes with a sleeker UI, a revamped library, and a simplified adjustment menu. The Elements creative suite is like having a higher-end version of the photo editing apps that come on a mobile device. Those are just a few of the highlights of Adobe's anticipated Photoshop release that just appeared on the company's website. The new features will be available in the update that will be available via Adobe's Creat Cloud subscription service beginning May 14. To get an even fatter update, you can start your subscription with the Ad-Free subscription (for $9.99 a month) that doesn't count the number of image-processing actions you use—so your subscription won't expire even if you do hundreds of edits per month. For those interested in a trial subscription, that's already available for free, and all of Adobe's Creative Cloud apps will get the update upon the May 14 launch of Photoshop CC.
