What We Didn't Like: -The online interface is quite basic. -It takes a long time to download the video. -There are many videos to be downloaded. -The online interface has not been updated in quite a while. Overall Score: 9.7 (Very Good) Latest from Our Blog The internet has changed the way we do business. It has changed how we communicate, how we interact, and it has fundamentally changed how we get things done. Gone are the days of waiting for mail to arrive. Today, we rely on email, SMS, WhatsApp, and Slack to get things done and stay connected with people. All of these are extremely convenient. However, they also have one huge drawback. They are limited in their function and power. They are limited by their size and can take up a huge amount of space on your phone. So you have built your first flippa listing, and it is ready to go live. You are anxiously awaiting a sale. That is when you start to receive the hate-mail. "How can this have sold for only $14?" "I would never have paid that much for it." "I will never sell on flippa again." These are all legitimate points, but they are also points that are based on false assumptions. They all assume the person selling the item is going to make a profit. In fact, they are assuming that they are the only person who will buy the item. This isn't always the case. KEYMACRO allows a consumer to record and playback live mouse and keyboard events using the Windows program K-Lite, together with custom macros and keystrokes. Keymacro has a number of key features: Support many keyboard macros. Manage all your macros in one place. Runs under Windows 10/8/7/Vista/XP. Customizable: has many options to customize your keystrokes, mouse clicks, and the timing of each macro. Freeze and unfreeze your keyboard, mouse, or a combination of the two. Allow users to set different keyboard shortcuts for each macro. Supports 32-bit and 64-bit platforms. Supports AMD/Intel and other platforms. Developers now offer a more powerful feature set that makes the program even more powerful for developers. Keymacro now has a new feature that allows users to create custom macros that will not only automate the mouse clicks and keyboard shortcuts, but they can also auto click, auto scroll, auto select, auto focus, and other functions. This new feature set will make the Keymacro program very powerful for all users, not just developers. This program, just like many other programs, will also allow you to freeze and unfreeze the mouse, and that is good because it can be a real pain if you have to click something and then click it again to unfreeze your mouse.
